Results-driven Cybersecurity professional with an M.S. in Cybersecurity from The City College of New York and 5+ years combined experience in security analysis, QA engineering, and cloud infrastructure. Skilled in vulnerability assessment, incident response, and compliance (GDPR, HIPAA, ISO 27001). Proven ability to bridge technical security controls with business requirements in Agile environments.

TECHNICAL SKILLS

Offensive Security: Vulnerability Assessment, Penetration Testing, Nmap, Burp Suite, OWASP ZAP, OWASP Top 10,MITRE ATT&CK, Wireshark, Network Security

Forensics & IR: Incident Response, Digital Forensics, Autopsy, Volatility, FTK Imager, SIEM (Splunk)

Cloud & DevSecOps: Azure (IaaS/PaaS/SaaS), AWS, AWS IAM, GCP, CI/CD, Azure DevOps, Kubernetes, Docker

Secure SDLC Compliance & GRC: GDPR, HIPAA, ISO 27001, SOC 2, ISO 13485, Risk Assessment, Compliance Auditing, Access Control

Programming: Python (XGBoost, Pandas, NumPy), C++, SQL,MySQL, MongoDB

Testing & AI Tools: Selenium, Cypress, Cucumber, Postman, JIRA, Confluence

Additional Skills: Threat Modeling, Cryptography, Secure Coding, Machine Learning, LLM & Prompt Security, Agile, Root Cause Analysis, Prompt Engineering

Soft Skills: Cross-Functional Collaboration, Process Documentation, Adaptability, Attention to Detail, Independent Initiative, Leadership

EXPERIENCE

Graduate Research Assistant — Research Foundation CUNY

NSF-Funded Research Project | John Jay College of Criminal Justice – CUNY 02/2025 – 12/2025

Concurrent with M.S. Cybersecurity studies at The City College of New York

- Applied prompt engineering techniques to develop and refine risk assessment modules for the IPV prevention tool, optimizing LLM prompt design to improve output accuracy and reliability for risk-detection use cases**.**
- Designed and implemented secure, scalable Azure enterprise-grade solutions (IaaS, PaaS, SaaS) aligned with business and compliance requirements.
- Developed and optimized CI/CD pipelines using Azure DevOps, improving deployment reliability across research environments.
- Conducted performance monitoring, troubleshooting, and optimization of Azure resources, reducing resource overhead.
- Collaborated with cross-functional teams including social scientists and project partners to deliver prototype tools for intimate partner violence prevention research.

Cybersecurity Analyst & Documentation Engineer — Sippa Solutions Inc.

LifeSci NYC Program Intern → Cybersecurity Analyst & Documentation Engineer 06/2023 – 02/2024

- Initially joined Sippa Solutions Inc. through the LifeSci NYC internship program and was subsequently selected for a full-time Cybersecurity Analyst & Documentation Engineer role.
- Performed risk assessments for existing IT infrastructures and delivered actionable remediation recommendations, reducing exposure across 3+ business units.
- Conducted vulnerability scans on servers, workstations, and network devices to identify and prioritize threats.
- Enforced ISO 27001 compliance measures across applications and company-wide systems, passing internal audits with zero major findings.
- Designed and enforced AWS IAM policies (least-privilege roles, MFA, access reviews) aligned with ISO 27001 requirements to close audit findings.
- Established and enhanced security processes using AWS infrastructure, supporting disaster recovery planning for multiple business units.
- Documented protocols and conducted internal audits to ensure strict adherence to ISO 13485 standards.
- Facilitated Agile test planning and performed API/security testing using Postman ahead of releases.

QA Engineer II — Brain Station 23 Ltd. 12/2018 – 08/2021

Client: Pharmaceutical sector (US & Europe)

- Conducted end-to-end test planning, implementation, and management for AEM applications for US and European pharmaceutical industry clients, following Agile methodologies, delivering 99% bug-free releases.
- Executed manual and automated testing using Selenium WebDriver, TestNG, Cypress, Cucumber, SQL, and Postman across multiple production environments.
- Performed penetration and security testing using Burp Suite and Postman against the OWASP Top 10, identifying vulnerabilities before go-live and working with developers on remediation.
- Maintained full traceability between requirements, test cases, results, and defects in bug-tracking systems.

EDUCATION

Master of Science in Cybersecurity Dec 2025
The City College of New York (CCNY) – Grove School of Engineering

Bachelor of Science in Computer Science & Engineering Dec 2018
American International University – Bangladesh

CERTIFICATIONS

- ISTQB Certified Tester – Foundation Level
- CISA (Certified Information Systems Auditor, ISACA) – In Progress
- Professional Scrum Master AI Essentials – In Progress

PUBLICATIONS & PRESENTATIONS

Co-authored: "Developing a Digital Tool for Preventing Intimate Partner Violence: The Realtime Translational Impact."
Presented at the 80th Annual Meeting of the American Society of Criminology (ASC), Washington, D.C., November 2025.
